

NYPGA's Propane Appliances Rebate Campaign 2019

Propane Marketer Accredited Representative

"PMAR" Form

Revised 010219

The NYPGA is pleased to announce its **2019** "Propane Appliances Rebate Campaign" for your customers.

This rebate program demonstrates the propane industry's commitment to consumer awareness, consumer safety, and the benefits of using propane. Note the 2019 program includes rebates for propane water heaters **AND propane boilers and furnaces**. This rebate program is offered for either conversions from other fuels to propane or upgrades of equipment from propane-to-propane. As before, the installation of appliances still requires a SAFETY CHECK following the installation. Rebates for this promotion range from \$150 to \$400 depending on details of the appliance involved. The SAFETY CHECK must provide required documentation of tests in order to qualify. Certain restrictions apply.

- 1) Rebate offer applies to all SAFETY CHECKS on replacement of units with propane from **Jan 1, 2019 to December 31, 2019** or until campaign funds are depleted. In 2019 propane-to-propane conversions and new construction installations **are** eligible. Rebate applications must be received at NYPGA on or before **December 31, 2019** to be eligible for the 2019 program.
- 2) This form must be submitted by your company (for each location) once during 2019, prior to any rebate applications, to participate in the rebates program.
- 3) The ["BUYER'S Rebate Application Form"](#) must be completed by both you and your customer before or upon the installation of the equipment.
- 4) The program is on a first come, first served basis. Once all rebate funding has been reserved/awarded the program will end.
- 5) The program will be administered by the NYPGA office with rebate checks going directly from the NYPGA to the consumer.
- 6) The NYPGA Marketing Committee reserves the right to periodically evaluate and adjust all aspects of the Program, as it deems necessary.
- 7) It is the Propane Marketer Accredited Representative's responsibility to become fully versed with the requirements of the NYPGA's Safe Appliance Installation.
- 8) The Propane Marketer Accredited Representative "PMAR" will be the only person from the company to handle rebate communications with NYPGA which includes emailing and calling about rebates. NYPGA will only accept rebate paperwork from the Propane Marketer's Accredited Representative. A propane marketer with more than one location may have one Accredited Representative from each location.

9) I, ***please print*** _____, certify that I understand the above stated rules, will train my employees to properly complete a safety check, will review safety checks prior to submission, be the Accredited Representative for my company location and will address any rebate discrepancies. I further understand that it is my responsibility to facilitate all rebate questions with my employees and customers and not refer them to the NYPGA.

*The safety inspection accompanying the installation of the qualifying appliance(s) will include one or more of the following:
1) a leak test; 2) a pressure test if required by applicable laws, rules and regulations; and 3) a flow and lock up test on the regulator[s].*
